

May 13, 2014

Dear Colleagues:

I would like to share with you that The University of Mississippi School of Pharmacy is in the process of raising funds to renovate the first and second floors of Faser Hall. Raina McClure, Director of Development, came by and briefly explained the renovation plans to me. The renovation will provide a cutting-edge skills lab, state-of-the-art research spaces, and upgrade the heating and air conditioning.

The MIPA Board of Directors discussed ideas on how independent pharmacies can contribute to this renovation project. Dean David Allen has done a great deal to reach out to independent pharmacies in Mississippi by creating a close relationship with the MIPA Board of Directors and visiting individual pharmacies across the state; therefore, the MIPA Board would like to extend our appreciation in support of this renovation project. To make a donation, please mail a check with the Faser Capital Campaign noted in the memo line made payable to the University of Mississippi Foundation. Please send all donations to the MIPA office, so we can collect all checks. Once we have collected the checks, we will then present the MIPA donation and your individual check to the School of Pharmacy.

Pharmacy has been a very rewarding profession for many of us, which warrants our support. Please consider this request and help the School of Pharmacy reach their renovation fund goal of \$8 million. The MIPA group support will be greatly appreciated by many future students and faculty.

Sincerely,

Rocky McGarity  
MIPA Chairman
